- ☐ **1. Internet telephony gateway location**
 Rosenberg, J.; Schulzrinne, H.;
[INFOCOM '98. Seventeenth Annual Joint Conference of the IEEE Computer and Communications Societies. Proceedings. IEEE](#)
 Volume 2, 29 March-2 April 1998 Page(s):488 - 496 vol.2
 Digital Object Identifier 10.1109/INFCOM.1998.665066
Summary: Although the Internet was designed to handle non-real time data traffic, it is being used increasingly to carry voice and video. One important class of contributors to this trend are Internet telephones. Critical to more widespread use of Internet telephony is the development of a standard for Internet telephony gateways.

- ☐ **2. An algorithm for automatic topology discovery of IP networks**
 Hwa-Chun Lin; Shou-Chuan Lai; Ping-Wen Chen;
[Communications, 1998. ICC 98. Conference Record. 1998 IEEE International Conference on](#)
 Volume 2, 7-11 June 1998 Page(s):1192 - 1196 vol.2
 Digital Object Identifier 10.1109/ICC.1998.685197
Summary: A topology discovery algorithm for IP networks is proposed. Topology information can be obtained from various sources including the MIBs in routers, the Internet Control Message Protocol (ICMP), the traceroute program, the

- ☐ **3. A transparent framework for enabling incoming TCP connections to host gateway**
 Pai, V.; Rana, P.;
[Computer Communications and Networks, 2003. ICCCN 2003. Proceedings. The](#)
[International Conference on](#)
 20-22 Oct. 2003 Page(s):572 - 575
 Digital Object Identifier 10.1109/ICCCN.2003.1284226
Summary: This paper proposes a transparent and dynamic system to enable incoming connections to hosts behind a NAT gateway without changes to client applications. This transparency is achieved with a daemon monitoring the gateway and modifications to the gateway's state.

5. An application of network address translation on gateway

Yuan Jianying; Zhou Jiantao; Wenjiang Pei; Taijun Wang;

Neural Networks and Signal Processing, 2003. Proceedings of the 2003 International Conference on

Volume 2, 14-17 Dec. 2003 Page(s):1658 - 1661 Vol.2

Digital Object Identifier 10.1109/ICNNSP.2003.1281201

Summary: Nowadays, one of the most compelling problems facing the IP Internet is depletion. Network Address Translation (NAT) is a kind of efficient solution. This paper discusses about the background of NAT's coming forth, developing and its overview, etc.

6. Packet filtering in bridge

Jianbing Liu; Yan Ma;

Internet Workshop, 1999. IWS 99

18-20 Feb. 1999 Page(s):94 - 98

Digital Object Identifier 10.1109/IWS.1999.810998

Summary: Filtering of unauthorized packets is a common way to improve network security. Packet filtering is described as one of the firewall systems, which is generally implemented in gateways and routers. Packet filtering of gateways and routers is dangerous, etc.
